Subject index

Acidity
Investigation of the dynamics of the change in redox potential and pH under experimental conditions of brain injury (Dubinin et al.) 403
Alternating currents
The effects of alternating currents on Na,K-ATPase function (Blank, Soo) 313
Amino acids
Studies in peptide utilization by microorganisms using biosensor techniques (Riedel et al.) 113
Ammonia
Urea oxidation kinetics via cyclic voltammetry. Application to regenerative hemodialysis (Patzer II et al.) 341
Amphiphiles
The formation of bilayer membranes and liquid-crystalline properties of amphiphiles (Shchipunov et al.) 45
Antibacterial effects
Electrochemical classification of antibacterial effects of beta-lactam antibiotics on *Escherichia coli* cultures (Jouenne, Junter) 331
Apomembranes
Properties of apomembranes treated with sodium borohydride (Lazarova) 105
ATP
Role of oxygen radicals in phenazine mediated ATP synthesis obtained with spinach chloroplasts. Toxicity of $OH^{\cdot}$ radicals (Tyszkiewicz, Roux) 323
The effects of alternating currents on Na,K-ATPase function (Blank, Soo) 313
Avidin
Electrochemical investigation of biotin–avidin interactions at a polycrystalline gold electrode (Champagne et al.) 159

Bacillus subtilis
Studies in peptide utilization by microorganisms using biosensor techniques (Riedel et al.) 113
Bacteria
DNA transfer through cell membranes in bacteria (Sabelnikov) 271
Bacteriorhodopsin
Properties of apomembranes treated with sodium borohydride (Lazarova) 105
Betalactam antibiotics
Electrochemical classification of antibacterial effects of beta-lactam antibiotics on *Escherichia coli* cultures (Jouenne, Junter) 331
Bilayer lipid membranes
Formation of self-assembled lipid bilayers on solid substrates (Tien, Salamon) 211
Bilayer membranes
The formation of bilayer membranes and liquid-crystalline properties of amphiphiles (Shchipunov et al.) 45
Bioluminescence
A proposed scheme for the activated bioluminescence of *Lampito mauritii* by ferrous ion injection (Santhanam, Limaye) 231
Electrobioluminescence of cells extracted from *Lampito mauritii* (Santhanam, Limaye) 219
Biosensor
A photoelectrochemical cell using immobilized photosynthetic membranes (Carpentier et al.) 391
The native collagen fibril — biosensor and signal conductor of the matrix of connective tissues. A new concept for a biological understanding of the regulation of connective tissues (Regling, Rückmann) 241
Biosensor techniques
Studies in peptide utilization by microorganisms using biosensor techniques (Riedel et al.) 113
Biotin
Electrochemical investigation of biotin–

avidin interactions at a polycrystalline gold electrode (Champagne et al.) 159
Biotin lauryl ester
Electrochemical investigation of biotin–avidin interactions at a polycrystalline gold electrode (Champagne et al.) 159
Brain injury
Investigation of the dynamics of the change in redox potential and pH under experimental conditions of brain injury (Dubinin et al.) 403

Cadmium carbonic anhydrase
Metallotropic forms of zinc, copper and cadmium carbonicanhydrases and zinc carboxypeptidase reflected in differential-pulse polarography (Studničková et al.) 299
Calcium channel
Interaction between the Na^+/Ca^{2+} antiporter and the Ca^{2+} channel in smooth muscle cells (Kazarian et al.) 175
Calcium ion
Chemiluminescent reactions of phagocytes induced by electroporation. The role of Ca^{2+} and Mg^{2+} ions (Malinin et al.) 37
Cartilage
The native collagen fibril — biosensor and signal conductor of the matrix of connective tissues. A new concept for a biological understanding of the regulation of connective tissues (Regling, Rückmann) 241
Catalase
Role of oxygen radicals in phenazine mediated ATP synthesis obtained with spinach chloroplasts. Toxicity of $OH^{\cdot}$ radicals (Tyszkiewicz, Roux) 323
Cell membranes
DNA transfer through cell membranes in bacteria (Sabelnikov) 271
Electrically stimulated rupture of cell membranes with a conducting polymer-coated electrodes (Shinohara et al.) 23
Passive electrical properties of biological cell membranes determined from Maxwell–Wagner conductivity dispersion measurements (Bordi et al.) 135
Cellular oscillators
The physical principle of Quincke rotation as a possible explanation for low frequency cellular oscillators (Fuhr, Hagedorn) 1
Cellulose formation
Hybridization of *Trichoderma reesei* protoplasts by electrofusion (Katenkamp et al.) 57
Chemiluminescent reactions
Chemiluminescent reactions of phagocytes induced by electroporation. The role of Ca^{2+} and Mg^{2+} ions (Malinin et al.) 37
Chloride ion-selective microelectrodes
Chloride ion-selective microelectrodes (Abe et al.) 411
Chlorophyll "*a*"
Electrochemical oxidation of chlorophyll "*a*" in thin films at Pt and SnO_2 electrodes (Suponeva et al.) 75
Chloroplast
Kinetics of photocurrent induction by a thylakoid containing electrochemical cell (Mimeault, Carpentier) 145
Cholera toxin
Cholera toxin complexes with the ganglioside GM1 in lipid monolayers and bilayers. Effect on structure and permeability (Miller et al.) 365
Collagen
The native collagen fibril — biosensor and signal conductor of the matrix of connective tissues. A new concept for a biological understanding of the regulation of connective tissues (Reglin, Rückmann) 241
Conductivity dispersion measurements
Passive electrical properties of biological cell membranes determined from Maxwell–Wagner conductivity dispersion measurements (Bordi et al.) 135
Connective tissues
The native collagen fibril — biosensor and signal conductor of the matrix of connective tissues. A new concept for a biological understanding of the regulation of connective tissues (Regling, Rückmann) 241
Copper carbonic anhydrase
Metallotropic forms of zinc, copper and cadmium carbonic anhydrases and zinc carboxypeptidase reflected in differential pulse polarography (Studničková et al.) 299
Cyclic voltammetry
Urea oxidation kinetics via cyclic voltammetry. Application to regenerative hemodialysis (Patzer II et al.) 341
Cytochrome oxidase
Cytochrome oxidase: molecular mechanism of functioning (Kharkats, Volkov) 91

Dichlorobenzoquinone
Kinetics of photocurrent induction by a thylakoid containing electrochemical cell (Mimeault, Carpentier) 145

Dielectric force
The physical prinicple of Quincke rotation as a possible explanation for low frequency cellular oscillators (Fuhr, Hagedorn) 1
Dielectrophoresis
Experimental verification of a theoretical treatment of the mechanism of dielectrophoresis (Marszałek et al.) 289
Differential pulse polarography
Metallotropic forms of zinc, copper and cadmium carbonic anhydrases and zinc carboxypeptidase reflected in differential pulse polarography (Studničková et al.) 299
Dioxygen reduction
Cytochrome oxidase: molecular mechanism of functioning (Kharkats, Vokov) 91
DNA
DNA transfer through cell membranes in bacteria (Sabelnikov) 271
Dynamic structure
The physical principle of Quincke rotation as a possible explanation for low frequency cellular oscillators (Fuhr, Hagedorn) 1

Electrical pulses
Changes in the surface charge of cells induced by electrical pulses (Tomov, Tsoneva) 127
Electrofusion
Hybridization of *Trichoderma reesei* protoplasts by electrofusion (Katenkamp et al.) 57
Electron hopping
Electrochemical oxidation of chlorophyll "*a*" in thin films at Pt and SnO_2 electrodes (Suponeva et al.) 75
Electron transport
Kinetics of photocurrent induction by a thylakoid containing electrochemical cell (Mimeault, Carpentier) 145
Electroporation
Chemiluminescent reactions of phagocytes induced by electroporation. The role of Ca^{2+} and Mg^{2+} ions (Malinin et al.) 37
Electrorotation measurements
Ac-field-induced KCl leakage from human red cells at low ionic strengths. Implications for electrorotation measurements (Georgiewa et al.) 255
Enzyme reduction
Reactions of horseradish peroxidase on a platinum cathode (Durliat et al.) 197
Erythrocytes
Ac-field-induced KCl leakage from human red cells at low ionic strengths. Implications for electrorotation measurements (Georgiewa et al.) 255
Electrically stimulated rupture of cell membranes with a conducting polymer-coated electrodes (Shinohara et al.) 23
Passive electrical properties of biological cell membranes determined from Maxwell–Wagner conductivity dispersion measurements (Bordi et al.) 135
Escherichia coli
Electrochemical classification of antibacterial effects of betalactam antibiotics on *Escherichia coli* cultures (Jouenne, Junter) 331

Ferrioxamine B
The increase in ferrioxamine B reduction potential with increasing acidity of the medium (Helman, Lawrence) 187
Ferrous ion
A proposed scheme for the activated bioluminescence of *Lampito mauritii* by ferrous ion injection (Santhanam, Limaye) 231
Flavin
Flavin-mediated photoregulation of nitrate reductase. A key point of control in inorganic nitrogen photosynthetic metabolism (De la Rosa et al.) 355
Flow-through glucose reactor
Design and development of a flow-through glucose reactor (Redinha et al.) 379

Gangliosides
Cholera toxin complexes with the ganglioside GM1 in lipid monolayers and bilayers. Effect on structure and permeability (Miller et al.) 365
Glucose
Design and development of a flow-through glucose reactor (Redinha et al.) 379
Glucose oxidase
Design and development of a flow-through glucose reactor (Redinha et al.) 379
Gold electrode
Electrochemical investigations of biotin–avidin interactions at a polycrystalline gold electrode (Champagne et al.) 159

Herbicides
A photoelectrochemical cell using immobi-

lized photosynthetic membranes (Carpentier et al.) 391
Horseradish peroxidase
Reactions of horseradish peroxidase on a platinum cathode (Durliat et al.) 197
Hydroxyl radicals
Role of oxygen radicals in phenazine mediated ATP synthesis obtained with spinach chloroplasts. Toxicity of $OH^{\cdot}$ radicals (Tyszkiewicz, Roux) 323

Immobilized photosynthetic membranes
A photoelectrochemical cell using immobilized photosynthetic membranes (Carpentier et al.) 391
Ionic flux
Ac-field-induced KCl leakage from human red cells at low ionic strengths. Implications for electrorotation measurements (Georgiewa et al.) 255
Ion transfer
Interaction between the Na^{+}/Ca^{2+} antiporter and the Ca^{2+} channel in smooth muscle cells (Kazarian et al.) 175

Karyogamy
Hybridization of *Trichoderma reesei* protoplasts by electrofusion (Katenkamp et al.) 57

Lampito mauritii
A proposed scheme for the activated bioluminescence of *Lampito mauritii* by ferrous ion injection (Santhanam, Limaye) 231
Electrobioluminescence of cells extracted from *Lampito mauritii* (Santhanam, Limaye) 219
Lanthanum ion
Properties of apomembranes treated with sodium borohydride (Lazarova) 105
Lecithin bilayer membranes
Sucrose influence of lecithin bilayer membranes and polypyrrole + lecithin bilayer membranes (Kotowski, Tien) 69
Lipid bilayers
Cholera toxin complexes with the ganglioside GMl in lipid monolayers and bilayers. Effect on structure and permeability (Miller et al.) 365
Lipid monolayers
Cholera toxin complexes with the ganglioside GMl in lipid monolayers and bilayers. Effect on structure and permeability (Miller et al.) 365
Liquid-crystalline properties
The formation of bilayer membranes and liquid-crystalline properties of amphiphiles (Shchipunov et al.) 45
Lossy dielectric
Experimental verification of a theoretical treatment of the mechanism of dielectrophoresis (Marszałek et al.) 289
Low frequency cellular oscillators
The physical principle of Quincke rotation as a possible explanation for low frequency cellular oscillators (Fuhr, Hagedorn) 1

Macromolecules
The physical principle of Quincke rotation as a possible explanation for low frequency cellular oscillators (Fuhr, Hagedorn) 1
Magnesium ion
Chemiluminescent reactions of phagocytes induced by electroporation. The role of Ca^{2+} and Mg^{2+} ions (Malinin et al.) 37
Maxwell–Wagner conductivity dispersion measurements
Passive electrical properties of biological cell membranes determined from Maxwell–Wagner conductivity dispersion measurements (Bordi et al.) 135
Membranes
The physical principle of Quincke rotation as a possible explanation for low frequency cellular oscillators (Fuhr, Hagedorn) 1
Mercury/solution interface
Reactions of proteins and polypeptides at mercury/solution and solid/solution interfaces (Razumas et al.) 9
Metal alkali ions
Passive electrical properties of biological cell membranes determined from Maxwell–Wagner conductivity dispersion measurements (Bordi et al.) 135
Metalloproteins
Metallotropic forms of zinc, copper and cadmium carbonic anhydrases and zinc carboxypeptidase reflected in differential pulse polarography (Studničková et al.) 299
Methional
Role of oxygen radicals in phenazine mediated ATP synthesis obtained with spinach chloroplasts. Toxicity of $OH^{\cdot}$ radicals (Tyszkiewicz, Roux) 323
Multielectron reaction kinetics
Cytochrome oxidase: molecular mechanism of functioning (Kharkats, Volkov) 91

Neurospora crassa
Experimental verification of a theoretical treatment of the mechanism of dielectrophoresis (Marszałek et al.) 289
Nitrate reductase
Flavin-mediated photoregulation of nitrate reductase. A key point of control in inorganic nitrogen photosynthetic metabolism (De la Rosa et al.) 355
Nitrogen
Flavin-mediated photoregulation of nitrate reductase. A key point of control in inorganic nitrogen photosynthetic metabolism (De la Rosa et al.) 355

Orthophosphate
Role of oxygen radicals in phenazine mediated ATP synthesis obtained with spinach chloroplasts. Toxicity of $OH^{\cdot}$ radicals (Tyszkiewicz, Roux) 323
Ouabain
The effects of alternating currents on Na,K-ATPase function (Blank, Soo) 313
Oxygen radicals
Role of oxygen radicals in phenazine mediated ATP synthesis obtained with spinach chloroplasts. Toxicity of $OH^{\cdot}$ radicals (Tyszkiewicz, Roux) 323

Peptide
Studies in peptide utilization by microorganisms using biosensor techniques (Riedel et al.) 113
Peroxidase compound III
Reactions of horseradish peroxidase on a platinum cathode (Durliat et al.) 197
Phagocytes
Chemiluminescent reactions of phagocytes induced by electroporation. The role of Ca^{2+} and Mg^{2+} ions (Malinin et al.) 37
Phenazine
Role of oxygen radicals in phenazine mediated ATP synthesis obtained with spinach chloroplasts. Toxicity of $OH^{\cdot}$ radicals (Tyszkiewicz, Roux) 323
Photocurrent
Kinetics of photocurrent induction by a thylakoid containing electrochemical cell (Mimeault, Carpentier) 145
Photoelectrochemical cell
A photoelectrochemical cell using immobilized photosynthetic membranes (Carpentier et al.) 391

Photosynthesis
Flavin-mediated photoregulation of nitrate reductase. A key point of control in inorganic nitrogen photosynthetic metabolism (De la Rosa et al.) 355
Photosynthetic membranes
A photoelectrochemical cell using immobilized photosynthetic membranes (Carpentier et al.) 391
Platinum electrode
Electrochemical oxidation of chlorophyll "*a*" in thin films at Pt and SnO_2 electrodes (Suponeva et al.) 75
Reactions of horseradish peroxidase on a platinum cathode (Durliat et al.) 197
Polymer-coated electrode
Electrically stimulated rupture of cell membranes with a conducting polymer-coated electrodes (Shinohara et al.) 23
Polypeptides
Reactions of proteins and polypeptides at mercury/solution and solid/solution interfaces (Razumas et al.) 9
Polypyrrole
Electrically stimulated rupture of cell membranes with a conducting polymer-coated electrodes (Shinohara et al.) 23
Polypyrrole + lecithin bilayer membranes
Sucrose influence of lecithin and polypyrrole + lecithin bilayer membranes (Kotowski, Tien) 69
Potassium chloride
Ac-field-induced KCl leakage from human red cells at low ionic strengths. Implications for electrorotation measurements (Georgiewa et al.) 255
Proteins
Reactions of proteins and polypeptides at mercury/solution and solid/solution interfaces (Razumas et al.) 9
Proteoliposomes
Properties of apomembranes treated with sodium borohydride (Lazarova) 105
Proton pump
Cytochrome oxidase: molecular mechanism of functioning (Kharkats, Volkov) 91
Protoplast fusion
Hybridization of *Trichoderma reesei* protoplasts by electrofusion (Katenkamp et al.) 57

Quincke rotation
The physical principle of Quincke rotation as

a possible explanation for low frequency cellular oscillators (Fuhr, Hagedorn) 1

Redox photoregulation
Flavin-mediated photoregulation of nitrate reductase. A key point of control in inorganic nitrogen photosynthetic metabolism (De la Rosa et al.) 355

Redox potential
Investigation of the dynamics of the change in redox potential and pH under experimental conditions of brain injury (Dubinin et al.) 403

Regenerative hemodialysis
Urea oxidation kinetics via cyclic voltammetry. Application to regenerative hemodialysis (Patzer II et al.) 341

Saccharomyces cerevisiae
Changes in the surface charge of cells induced by electrical pulses (Tomov, Tsoneva) 127

Signal conductor
The native collagen fibril — biosensor and signal conductor of the matrix of connective tissues. A new concept for a biological understanding of the regulation of connective tissues (Regling, Rückmann) 241

Silver/silver chloride microelectrode
Chloride ion-selective microelectrodes (Abe et al.) 411

Smooth muscle cells
Interaction between the Na^+/Ca^{2+} antiporter and the Ca^{2+} channel in smooth muscle cells (Kazarian et al.) 175

Sodium borohydride
Properties of apomembranes treated with sodium borohydride (Lazarova) 105

Sodium/calcium antiporter
Interaction between the Na^+/Ca^{2+} antiporter and the Ca^{2+} channel in smooth muscle cells (Kazarian et al.) 175

Sodium,potassium-ATPase
The effects of alternating currents on Na,K-ATPase function (Blank, Soo) 313

Solid/solution interface
Reactions of proteins and polypeptides at mercury/solution and solid/solution interfaces (Razumas et al.) 9

Solid substrates
Formation of self-assembled lipid bilayers on solid substrates (Tien, Salamon) 211

Spinach chloroplasts
Role of oxygen radicals in phenazine mediated ATP synthesis obtained with spinach chloroplasts. Toxicity of $OH^{\cdot}$ radicals (Tyszkiewicz, Roux) 323

Sucrose
Sucrose influence of lecithin and polypyrrole + lecithin bilayer membranes (Kotowski, Tien) 69

Superoxide dismutase
Role of oxygen radicals in phenazine mediated ATP synthesis obtained with spinach chloroplasts. Toxicity of $OH^{\cdot}$ radicals (Tyszkiewicz, Roux) 323

Surface charge
Changes in the surface charge of cells induced by electrical pulses (Tomov, Tsoneva) 127

Thallium ion
Cholera toxin complexes with the ganglioside GMl in lipid monolayers and bilayers. Effect on structure and permeability (Miller et al.) 365

Thin films
Electrochemical oxidation of chlorophyl "*a*" in thin films at Pt and SnO_2 electrodes (Suponeva et al.) 75

Thylakoid membranes
A photoelectrochemical cell using immobilized photosynthetic membranes (Carpentier et al.) 391
Kinetics of photocurrent induction by a thylakoid containing electrochemical cell (Mimeault, Carpentier) 145

Tin oxide electrode
Electrochemical oxidation of chlorophyll "*a*" in thin films at Pt and SnO_2 electrodes (Suponeva et al.) 75

Trichoderma reesei
Hybridization of *Trichoderma reesei* protoplasts by electrofusion (Katenkamp et al.) 57

Trichosporon cutaneum
Studies in peptide utilization by microorganisms using biosensor techniques (Riedel et al.) 113

Urea
Urea oxidation kinetics via cyclic voltammetry. Application to regenerative hemodialysis (Patzer II et al.) 341

Zinc carbonic anhydrase
Metallotropic forms of zinc, copper and cadmium carbonic anhydrases and zinc

carboxypeptidase reflected in differential pulse polarography (Studničková et al.) 299
Zinc carboxypeptidase
Metallotropic forms of zinc, copper and cadmium carbonic anhydrases and zinc carboxypeptidase reflected in differential pulse polarography (Studničková et al.) 299
